

Professional Summary

Lucas Campbell is a recent Master’s of Planning graduate from the University of Calgary’s CIP-accredited School of Architecture, Planning, and Landscape with an undergraduate background majoring in Economics, and minoring in Computer Science and Environmental Studies. He has experience supporting urban development initiatives through data analysis, policy research, and design thinking.

As a Planning Assistant with the City of Regina, Lucas supported municipal planning initiatives by visualizing data, engaging with the public, and contributing to heritage and economic development projects through research and analysis. His previous role as a Business Metrics Analyst equipped him with strong analytical skills, which he applies to evidence-based planning solutions. Lucas is dedicated to creating equitable, sustainable communities through both policy and design.
